Table of Contents

Chapter 1 INTRODUCTION 1
Chapter 2 USING NU-PROLOG 3
2.1 Getting Started 4
2.2 *nc* – NU-Prolog Compiler 6
2.3 *np* – NU-Prolog Interpreter 8
2.4 *nit* – NU-Prolog Program Checker 11
2.5 *nac* – NU-Prolog control preprocessor 14
2.6 *revise* – Incremental Program Revision Facility 17
Chapter 3 SYNTAX OF NU-PROLOG 19
3.1 Variables 19
3.2 Constants 20
3.2.1 Atoms 20
3.2.2 Integers 20
3.2.3 Floats 20
3.3 Terms 22
3.4 Clauses 22
3.5 Predicates 22
3.6 Lists 23
3.7 Strings 23
3.8 Operators 24
3.9 Comments 25
Chapter 4 SEMANTICS OF NU-PROLOG 27
4.1 Semantics 27
4.1.1 Declarative Semantics 28
4.1.2 Operational Semantics 28
4.2 Declarative Constructs 29
4.2.1 Standard Constructs 29
4.2.2 Quantifiers 30
4.2.3 Negation, Implication, and Related Constructs 30
4.2.4 Aggregate Functions 32
4.2.5 When Declarations 34
4.3 Non-declarative Constructs 36
4.3.1 Non-logical Quantifiers 36
4.3.2 Cut 36
4.3.3 Non-logical Constructs 36
Chapter 5 SYSTEM PREDICATES 39
5.1 Predicates which Succeed or Fail 39
5.2 Predicates for Conditional Compilation or Loading 40
5.3 Interpreter Predicates 41
5.3.1 Examining the Program State 41
5.3.2 Examining and Controlling the Execution State 41

5.3.3 Debugging Predicates 43
5.4 Terms and Lists 47
5.4.1 Manipulating Lists 47
5.4.2 Examining Characters 49
5.4.3 Examining Terms 49
5.4.4 Modifying Terms 53
5.4.5 Comparison of Terms 53
5.5 Arithmetic Operators and Predicates 55
5.5.1 Arithmetic Operators 55
5.5.2 Arithmetic Predicates 59
5.6 I/O Predicates 62
5.6.1 Stream Management Predicates 62
5.6.2 Input Predicates 65
5.6.3 Output Predicates 70
5.7 Database Predicates 77
5.7.1 Loading and Saving Programs 77
5.7.2 Property List Predicates 78
5.7.3 Accessing and Updating Dynamic Predicates 80
5.8 Predicates for External Databases 83
5.8.1 Creating and Using External Databases 83
5.8.2 Dynamic Superimposed Codeword Databases 84
5.8.3 Static Superimposed Codeword Databases 85
5.8.4 UNIFY Databases 86
5.8.5 Compiled Rule databases 88
5.9 Miscellaneous Predicates 89
5.10 Predicates for Accessing the UNIX Operating System 93
5.11 Foreign Function Interface 99
Chapter 6 LIBRARY PREDICATES 103
6.1 Compatibility 104
6.2 Ordered Sets 107
6.3 Debugging 109
6.3.1 Initializing the debugging environment 109
6.3.2 Accessing the debugging environment 109
6.3.3 Manipulting the debugging environment 111
6.3.4 Miscellaneous 113
6.4 Curses 114
6.4.1 Access to Global Variables 114
6.4.2 Output Predictes 115
6.4.3 Input Predicates 119
6.4.4 Miscellaneous Predicates 120
6.4.5 Details 123
APPENDIX 1 – Example NU-Prolog Programs 124
APPENDIX 2 – Definite Clause Grammars 130
APPENDIX 3 – Using the NU-Prolog Compiler 133

APPENDIX 4 – Porting MU-Prolog Programs to NU-Prolog 134
APPENDIX 5 – Using DSIMC Databases 135
APPENDIX 6 – Reserved Predicate Names 137
APPENDIX 7 – Permitted Characters 138
APPENDIX 8 – Standard Operator Declarations 143
APPENDIX 9 – Signals 144
APPENDIX 10 – Bugs and Limitations of NU-Prolog 145
